Chris Bastian has always been curious about the living world around him. Chris chose to pursue a career in science because, in his words, “I was always fascinated with the way the body worked, its systems, what it was made up of, and everything in between.”

“The people at NDSCS are some of the best friends I have made.”

Chris Bastian

As a teenager, Chris wanted to be a Chiropractor. He chose NDSCS because of our Liberal Arts Transfer Curriculum Plan in Chiropractic and because he wanted to play Wildcat Football. Chris went on to play linebacker for the Wildcats, but changed his mind about being a Chiropractor. He still wanted a work in a science or health-related field so he pursued a degree in Liberal Arts-Natural Science. After leaving NDSCS Chris transferred to University of Wisconsin-Stout and currently works for Pfizer Pharmaceuticals in New York City.

While at NDSCS, Chris was very active in campus life. In addition to playing football, Chris was a resident assistant in Robertson Hall and a volunteer for Special Olympics.

Chris credits his experiences at NDSCS for helping make him the successful professional he is today.

Once a Wildcat, Always a Wildcat.

Chris Bastian

Hometown: Maplewood, MN
